The Exposition to Be Unique in Many Respects.

Elaborate Scale-The Electrical Features-Exhibits From the "Colonies"-The Government Buildings Going Up Somewhat Slowly.

BUFFALO, N. Y., Nov. 1 .- The people of Buffalo are very much in earnest in the determination to make a great success of their Pan-American Exposition, which is to open on May 1, 1901.

It is said the municipality and the citizens have contributed about \$4,000,000, which is a splendid showing for a city of 400,000 people. Three thousand men are now at work on the grounds and the buildings, and while they will have to work hard to get through, no doubt is expressed by the management that everything will be in readiness when the day arrives to throw open the gates. The draftsmen and the higher skilled artisans and mechanic are housed in a building on the grounds, where they sleep, eat, and live, so that no time can be lost and they will always be

time can be lost and they will always be on hand in any emergency.

Heretofore at all the great expositions held in this country the buildings have been of a dead white. Now the design is to tint the buildings with different colors, brilliant and subdued, so the effect may be heightened by contrast. The Spanish Renaissance will be the general style of architecture, out of compliment to the countries of Central and South America. This will afford an opportunity for domes, balconies, pavilions, towers, minarets, etc., alconies, pavilions, towers, minarets, etc. greater abundance and more varied dis-

Exhibits will not be refused from any of the countries of Europe which may offer them, but, as its name implies, the exposition is designed primarily for the products and the creations of North and South

Buffalo is an ideal place for the holding of an exposition. It has a pleasant sum-mer climate, it is one of the greatest rail-road points in the United States, it is a more populous centre than Chicago, for half he people of the United States are within the people of the United States are within a day's journey, and within a ride of an hour is that stupendous wonder of nature, Niagara Falls. As is known the vast water power at Niagara has been utilized for the establishment of gigantic electric plants, representing an investment of many millions of dolars. From these plants power is supplied to everything that needs it for miles around. Mills, factories, the whole street car system of Buffalo, its electric lighting, newspaper presses, all reric lighting, newspaper presses, all re-

ceive their power from this source.

The progress and development in the appliance of electricity from day to day appears almost as rapid as its own current. Visitors at the Omaha Exposition in 1898 observed with wonder the pace at which it had progressed since the time of the Chicago Exposition. The contrast at Buffalo in 1901 will be more marked and more startling.

All the motive power for the exposition and all its illumination will come from the same source. The electrical

tion and all its illumination will come from the same source. The electrical building will be of splendid proportions, 150 by 500 foet, and affording 75,000 square feet for exhibits, which will be divided into no less than fourteen groups, including every device, useful and ornamental, for which eletricity is used in earth, air, and water. With the unlimited supply at command, labor and ingenuity will be taxed to the utmost to produce fantastic and brilliant effects in every feature of display and illumination very feature of display and illumination n which they can be employed. Great attention will be given to fountain and floral effects, to sculptural ornamentation, color decorations, and court settings. The incandescent lamp will be used in the courts and no are lights.

An electric tower to be 375 feet high is

A Happy Combination. "Of the many dentifrices I have used in the past ten years I have found your Sozodont to be pre-eminent. You have made a happy combination of antiseptic and healing remedies, with a delightful taste and fragrance beyond comparison."

now half way up. From this tower will be displayed electrical phenomena ch a scale heretofore impossible. The tower is to be the centrepiece of the exposition, and its illumination at night will be gorgeous and magnificent beyond description.
The automobile, which some think is destined to crowd out the horse, is such a recent invention that no display of it of consequence was attempted at any former exposition. Millions of dollars are invest-ed in this interest, and there will be the first great exhibition of motor carriages on this continent.

on this continent.

Buffalo will derive a permanent benefit of substantial character from its expest tion, which did not accrue to Philadel tion, which did not accrue to Philadelphia. New Orleans, Nashville, Chicago, Atlanta, or Omaha. It will have two splendid buildings for the amusement and edification of its people, which will remain long after all memories of the exposition itself have vanished. The State of New York is spending \$100,000 on its building, to be of marble, and fireproof. After the exposition it is to be handed over to the Buffalo Historical Society. The society has added \$45,000 and the city \$25,000 for the building. The design of the building is to be after the Order of

the building is to be after the order of Parthenon at Athens.

J. Albright, a philanthropist of Buf-J. J. Albright, a philanthropist of Burlalo, is at his own expense putting up the art building, of Ionic architecture and to cost \$350,000. This edifice will be of white marble from the famous Beaver Dam quarry of Maryland. It is to be presented to the Buffalo Fine Arts Academy, which will make its present valuable collection will make its present valuable collection the nucleus for future acquisitions. Buffalo by popular subscription has raised a fund of \$100,000 for its maintenance.

One of the schemes of the management

is to have Buffalo made the great convention city during the six months of the ex-position, and it is a scheme which is like-

President McKinley has ordered his ofials in the different "colonies" of the United States to collect exhibits for the exposition. The exposition management innounces that the largest collection is expected from the Philippine Islands, but how this can be when our forces cannot venture beyond sight of the fortified towns not explained. Governor General Wood, of Cuba, has promised to send a fine display from his principality. A departure from the usual order of ex-positions is that there will be no sepa-

positions is that there will be no separate building for exhibit of women's work. Whatever the women of the country contribute will be scattered around in the various divisions. To make amends for this omission a board of managers consisting of twenty-five representative women of Buffalo has been organized, which will look after the entertainment of the eminent women who come, and the term "eminent" will no doubt be given a wide latitude

The grounds of the exposition are one mile long and half a mile wide. The buildings will not be scattered over such a broad space as at Chicago, which is much better for comfort and convenience There is an unlimited supply of water, and it will be liberally used for lakes, canals, fountains, etc. The aquatic basin in the court of fountains will cover more than two acres.

The National Government appropriated The National Government appropriated \$500,000 for buildings and exhibits, and the department heads at Washington have promised the exhibits shall be greater and more interesting than any previous Government collections. However, if there is not more despatch shown than is apparent at this time the Government buildings will not be in a condition for the reception of goods when the first of May arrives.

As few preparations are in evidence for istinctive State exhibits there will probably be no great show in that line. This is just as well, for heretofore these State exhibits have consisted largely of logs of wood, big pieces of bark, a lot of stones of all shapes and sizes, cabbages, apples, and an array of preserves and canned ar-ticles of the kind which are shown at ev-ery county fair.

The management has undertaken to have a horse show on the fashionable lines of these exhibitions in the great cit-This is rather an ambitious undertaking, but they expect to put it through with eclat.

The concert programme, it may be as-The concert programme, it may be assumed, will be a success, as pretty nearly all the famous bands throughout the whole American Continent will come during different periods of the exposition. Sousa, beginning June 10, will play daily for four weeks. In July the great Saengerfest will be held here, when an attendance of 5,000 singers is promised.

SITUATION IN DELAWARE

Democrats Likely to Win, if the Count Is Honest.

hairman Saulsbury Expects the State to Give His Party Three Thousand Majority+The Legislature Admitted to be in Doubt. Dissension in Republican Ranks.

WILMINGTON, Del., Nov. 1.-Willard Saulsbury, Chairman of the Democratic State Central Committee, says that with an honest count the Democrats will carry the State by about 3,000 majority.

Mr. Saulsbury feels much encouraged over the way things are shaping themselves. There is not a locality in the State in which the party is not harmonious and in good working order. In the "Shoestring Saulsbury added:

"Our candidate for Governor, Peter J. Ford, by active and enterprising method: has met almost all the people of the State, and the impression he makes upon them is uniformly good. I am satisfied that any objection waich existed to Mr. Ford by reason of a lack of personal acquaintance with the people of the lower counties has been entirely done away with and I am surprised at the enthusiastic support he is everywhere receiving. Dr. Hoey, the can didate for Lieutenant Governor, is doing remarkably good work, and is recognized as a litting man to be on the ticket. other candidates are hustlers, too. only thing that by any possibility can defeat the Democratic party is the over-whelming use of cash."

J. Edward Addicks was here yesterday

nsulting political friends. Reports from Kent county are to the effect that the Addicks Republicans may heavily cut Dr. L. Heisley Ball, the nomi-nee for member of Congress. Dr. Ball is a stanch anti-Addicks man, and he was accepted on the ticket with many grimas by the Addicks lieutenants. It appears t by the Addicks lieutenants. It appears to be generally admitted that the control of the Legislature is in doubt. Some of the Addicks leaders in Kent declare that if the Republicans should lose the Legislature and elect the Congressman Dr. Ball would be in a position to dispense the patronage and the Advicks men would get little of it. On the offer hand if the Legislature and elect the congressman Dr. Ball would be in a position to dispense the patronage and the Advicks men would get little of it. On the offer hand if the Legislature is the legislature in the legislature in the legislature is the legislature in the legislature in the legislature is the legislature in the legislature in the legislature is the legislature in the legislature in the legislature is the legislature in the legislature in the legislature is the legislature in the legislature in the legislature is the legislature in the little of it. On the other hand, if the Leg-islature is lost and the Democrats get the Congressman, provided McKinley is re-elected, National Committeeman Addicks would have the disposal of the patronage. In this county the Republicans appear be short of money. The negroes who dur-ing the primary election canvass organized "grafting clubs" and "bled" the candidates for large sums with bogus promises are said to be trying the same game now, but the Republican managers are not going to supply them with cash. Some of these negroes are making overtures to the Dem-ocratic leaders to take their clubs out of town on election day. The Republicans

ing every effort to get funds. One of the nominees for a high position has refused to pay any assessment.

have assessed the candidates and are mak

SOCIAL AND PERSONAL. A wedding of more than local interest was solemnized at noon today at the residence of Mrs. Bishop W. Perkins, widow of Senator Perkins of Kansas. The bride was her daughter, Miss Josephine Perkins, and the groom, Mr. William Alexander Hill, of the old Maryland family of that name. The ceremony was performed by Rev. D. J. Stafford, D. D., in the presence of members of both families and a few intimate friends, and was followed by a reception, which was attended by about 200 guests. The decoration of the drawing-room floor consisted of an artistic blending of paims and other foliage plants, with La France roses and pink chrysanthemums. The ceremony was performed under a floral wedding bell in the bay window, which had been transformed into the bay window. formed into a bridal bower by rose-tinted blossoms and palms. The window was draped with a curtain of asparagus vines and the mantels were banked with fern. The bride entered the drawing-room with arrived safely at Charleston, and from that her brother, Mr. Bishop Chapman Perkins port the fleet will proceed to Tampa. by whom she was given in marriage. Her of whom she was given in harriage. Her ideally lovely gown was of silver embroidered chiffon, over white liberty silk. She wore a tulle veil draped with classic sim-

crepe de chene.

Among those who attended the ceremony were Mr. and Mrs. P. H. Hill, parents of the groom; Miss Nellie Hill, or Mariboro, Md., and Miss Florence Cary, of New York. Guests at the reception included Commander and Mrs. David Smith, the Misses Evans, Mr. and Mrs. Colin Studds, the Misses German, Dr. and Mrs. Percy Hickling, Mr. and Mrs. Beale Howard, Dr. and Mrs. Hamlin. Mr. and Mrs. Needham Mr. repe de chene. ling, Mr. and Mrs. Beale Howard, Dr. and Mrs. Hamlin, Mr. and Mrs. Needham, Mr. and Mrs. Wilkins, Mrs. Martha Robinson, Mr. Adams Clark Tonner, Miss Tonner, Mr. and Mrs. Clark Tonner, Miss Maude Talmage, Miss Swayze, Mr. and Mrs. Cranford, Mr. and Mrs. Mearns, Miss Edson, Mr. and Mrs. Howard Clagett, Mr. and Mrs. De Witt Arnold, Mr. and Mrs. B. H. Warner, Miss Warner, Mrs. Hough, Mr. and Mrs. George Christency, Mr. and Mrs. Waggaman, Mr. and Mrs. Thomas C. and Mrs. George Christeney, archaea C. Waggaman, Mr. and Mrs. Thomas C. Noyes, Senator and Miss Beveridge, Mr. and Mrs. W. W. Burdette, and Miss Burand Mrs. Thomas C.

Mr. and Mrs. Richard Townsend are catablished in their palatial new mansion in Massachusetts Avenue. The residence, mainly of marble, is surrounded by ample grounds, and is the most imposing example of the architecture of its variety in Washington. The first notable social event to be given by Mr. and Mrs. Townsend will be a December ball, which will mark the debut of their daughter, Miss Matilde Townsend.

The Marquis and Marquise de San Carlos de Pedrosa, of Spain, who have been spending the past week in Philadelphia, will arrive in this city tomorrow.

The Admiral of the Navy and Mrs. Dewey are established for the winter at their Washington home.

The marriage of Miss Caroline Williamrine marriage of Miss Caroline Williamson Tilley, daughter of Commander B. F. Tilley, United States Navy, to Mr. Alfred Randolph Hyatt, of Baltimore, will take place on Wednesday. November 14, at noon, at the family residence in this city.

Salt Rheum

You may call it eczema, tetter or milk
